- ► High-performance satellite speaker for use with subwoofers

The KP6012 is a premium high-output lightweight full-range loudspeaker.

The KP6012 uses a JBL 262H-1 305 mm (12 in) Differential Drive® woofer and a 2408H-1 37.5 mm (1.5 in) annular polymer diaphragm, neodymium compression driver for 350 watts power capacity. 70° x 60° coverage pattern provides smooth, even coverage whether used in the vertical or horizontal orientation. The highslope passive network minimizes band overlap.

The enclosure is constructed of 15 mm multi-ply high quality plywood and finished in a durable black paint coating. The trapezoid enclosure is fitted with dual Neutrik NL4MP connector for loop thru connection, fifteen M10 threaded suspension points, four M10 screws for Karaoke bracket mounting, a 35 mm pole mount. It utilizes a 16 gauge protective screen backed steel grille to provide driver protection with a very professional appearance.

¹ Full space (4π) conditions

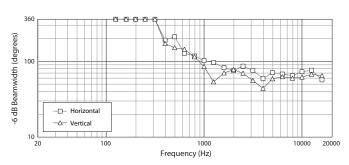

JBL continually engages in research related to product improvement. Some materials, production methods and design refinements are introduced into existing products without notice as a routine expression of that philosophy. For this reason, any current JBL product may differ in some respect from its published description, but will always equal or exceed the original design specifications unless otherwise stated.

² IEC pink noise with 6 dB crest factor, in frequency range for 2 hours
